Start Educating Your People QuicklyWith each new era you will need more educated workers. As in most builders of cities cities in Tropico 6 the start of the game is very important. This is why you must build the Master's Office next to every large industrial center. Avoid erecting such buildings in places where the possibilities of expansion³ are limited. All in all, you can find everything you need to monitor every aspect of your banana republic. Lift the plantation³ the right place and ³ it in operating mode. Investing ³ in factoriesBuilding your economy on agriculture and the exploitation ³ natural resources is possible, but not very profitable. Early in the game you'll have a shortage of people. The number of free jobs and unemployed people can be found in Almanac. You can start building houses for rich people after people of higher social status (e.g., more) move to your country. Therefore, it is important to skip the construction ³ houses for the rich from the beginning. This translates into a lack of funding ³ the next ³ buildings and diminishing the trust your subjects place in you. Familiarize yourself with the location ³ the raw materials When you start the game, familiar³ with the distribution of resources on each island. In the panel with all the ³ information, see the wealth of this person [1]. The rum distiller is available from the colonial era. It is available from the colonial era. Do not build a large number of buildings. Every building requires workers. The ³ site of each building and the target group are mentioned in the ³ panel of the building. Control the range of buildings Buildings such as the Fire ³ Station or the PerÄ³ have a specific operating range. Create a library as soon as possibleThe library is the ³ location where knowledge points are generated. Therefore, erect a library as soon as possible. The second way is to consult the People tab in the ³ general. If you invest in the wrong buildings, your tropical paradise will begin to generate very fast loss. Build suitable residential buildings in adequate The initial stages of the game, most of its citizens will represent the most poor straties of society. The available classification options are wealth [2]. It is marked with a blue circle. Even if you do not plan to initially perform any research, you will pick up points for the technologies that will develop in the future. Only after his country begins to generate benefits, it is the right time to begin to expand to the next islands within the archipege. The first involves clicking on a citizen. Because of that, you must build high school and college as soon as possible. Then, you can find some advice on how not to lead to such a situation. During the initial phases of the game, it is a good idea to produce Ron. If you have already begun to expand your country to other islands, do not forget to build the teamster port, which will allow you to exchange merchandise throughout the Teamster Port Lake Surrounded by Industrial Facilities. Summary Signage Complete information about your country. This allows you to act quickly when something goes wrong. By clicking on that tab, you will see a graph of how your society differs in terms of wealth. It will help you plan the future distribution of the majority of industrial centers. The richness of certain citizens can be inspected in two ways. Otherwise, you will have to use raids and pay employers off the island (you can hire them by clicking on the free place of a building). Depending on the time in which you start the game, you can build different residential buildings. Therefore, avoid creating too many buildings. The processing of some of the resources in the factors allows you to generate more benefit. benefit.
